

Product: **T-SHIRT with high visibility "LIVERPOOL"**

Intended use: Vest are worn as top clothes - **they are highly visible and must not be covered by other clothes or accessories.**

T-SHIRT is well visible in dangerous situations during a day under any lighting conditions and also when it gets dark and the person is illuminated of a vehicle. These clothes should be worn by everyone who is exposed to such situation. They may substantially reduce any risk of accident.

The examples of activities may include works carried out on roads, maintenance of tracks, rehabilitation of contaminated areas, emergency and ambulance service, transport, post services, security agencies, handling works in areas with moving vehicles etc.

Selection of the right reflective occupational clothes with high visibility in accordance with the respective class must be carried out according to specific needs of the respective workplace, type of risk, and concrete conditions of the respective workplace. The right selection is within competence of an employer, who must determine and select the right type of clothes before they are used.

Pictograms:

	2 max 50x	EN ISO 20471:2013 Class 2 based on the area of conspicuous materials. See tab. Maximum number of washing cycles during which the clothes preserve their reflective properties.
---	--------------	---

Minimum required area of conspicuous material in m²

	Clothes of class 3	Clothes of class 2	Clothes of class 1
Underlying material	0,80	0,50	0,14
Retroreflective material	0,20	0,13	0,10

The clothes conform to the basic hygienic and safety requirements in accordance with the Regulation (EU) 2016/425 and other standards mentioned in this document. Personal protective clothes of II. Class

Laws, standards, regulations:

EN ISO 13688:2013

EN ISO 20471:2013

Identification of the Notified Body that carried out the conformity assessment: Institut pro testování a certifikaci, a.s. (Institute for testing and certification), tř. Tomáše Bati 299, 764 21 Zlín-Louky, CZ, Notified body no. 1023.

Restricted use: The clothes must not come into contact with liquid chemicals, particularly with dissolving agents and fire. It is also necessary to avoid excessive mechanical damage, particularly retro-reflective parts (tearing, braking off etc.).

Transportation, packaging type: The products are packed in PE bags. The products must not be damaged during their transportation.

Storage: Do not store in places with direct sun. Store the clothes in closed, dry, dust free, well ventilated stores. Protect them against radiant heat of heating devices. They must be stored not closer than 1 m at least from heating bodies. If the clothes are wet, leave them to dry out at room temperature and then store them.

Material composition: 100% polyester, reflective stripes - glass marbles on textile base.

Sizes: Sizes corresponding to the prescribed intervals in accordance with EN ISO 13688:2013.

The clothes are manufactured in the standard height 170-182cm. XS – 5XL

Permitted tolerance of deviations in dimensions is +4 and -3%.

Maintenance and cleaning:

The user finds the product maintenance symbols on sewn-on label.

How to maintain at home: Not more than 50 washing cycles; washing as a synthetic material with max. temperature of 40 °C; do not use BIO laundry detergents and agents that contain optical highlighters; considerate handling; rinsing in cold water; short spinning; no bleaching; no tumble drying; no ironing; no chemical cleaning.

Manual cleaning of reflective strips:

1. Water 40 °C - soft cloth, sponge or soft brush.
2. Considerate laundry detergent or cleaning agent.
3. Rinse the clothes after cleaning and leave them to get dried.

The maximum number of washing cycles applies only for the properties related to high visibility.

Warning:

- Check the clothes' condition visually before every use. The clothes must be kept clean to remain functional. If they are dirty or pale, replace them immediately!!!
- If integrity of the clothing becomes disrupted (rupture, wearing out, material excessive thinning, unstitched seams etc.), the degree of protection is lower and the product becomes inconvenient in accordance with above specified legal and technical regulations.
- Repair them only using the materials and fabrics that meet the requirements of the respective standard.
- The protection class is determined based on the area of visible material; therefore marking of the clothes on their surface is restricted or limited.
- If the product is used, kept, or treated differently than as specified here in this document, it may be destroyed or its functions may be changed.
- The clothes preserve their reflective properties during not more than 50 washing cycles. The clothes should be put out of operation after 50 washing cycles. The above-specified maximum number of washing cycles is not the only factor related to the life of the clothes. The clothes' life will depend on their using, storing etc.
- Wearing high visibility clothing does not provide a guarantee that the user will be visible in every situation.

If the clothing is used when strictly following the specified purpose, then there are no hazards that could endanger the user's health (the product must not be used in the circumstances that require other types of protective functions, e.g. protection against heat hazards, clothing caught by moving parts of a machine etc.).

Disposal: Disposal of clothes is regulated by legislation of individual countries or by local regulations. Disposal by burning.

The Declaration of Conformity can be found here: www.canis.cz; for individual products, in the bar "Documents to download".

Marking: Sewed-in label (sample)
